DRAINAGE FOR HOME AND GARDEN

COMPLETE CHANNEL MADE FROM GRP WITH GALVANISED WEB GRATE

GRP

DRAINAGE CHANNELS: LIGHTWEIGHT AND INDESTRUCTIBLE

We are the specialists for manufacturing and processing glass fibre-reinforced plastic, GRP for short. You are literally holding the advantages of this lightweight building material in your hand:

- ✓ A very long service life, since GRP drainage channels are extremely resistant to static and thermal loads
- ✓ Environmentally friendly and can be recycled
- ✓ Flame retardant, no problems with hot mix asphalt
- ✓ Easy to transport, since it is 4 to 8 times lighter than concrete or polymer concrete products, depending on the design
- ✓ Easy Installation by only one person

MEAHOME CLASSIC

In areas around the house and in front of the garage, it is the solution for everyone looking for a simple, inexpensive and reliable drainage solution, but who do not want to compromise when it comes to functionality and quality.

The channel body consists of environmentally friendly and recyclable MEA GRP, is virtually unbreakable and is extremely lightweight.

With its specially shaped inlet slots, the cover made of galvanised steel reduces the entry of large impurities into the channel body and ensures minimal maintenance.

MEAHOME CLASSIC channel

- ✓ Channel body made of GRP
- ✓ Clear width of 100mm
- ✓ Height of 79mm
- ✓ With galvanised slotted grating, walkable
- ✓ Slotted design provides for reduced dirt entry into the channel and less cleaning effort
- ✓ Flow-optimised internal cross section with smooth walls for excellent drainage capacity

MEAHOME CLASSIC 3-pack

- ✓ 3-metre MEAHOME CLASSIC channel
- ✓ Includes outlet set with outlet connection, odour trap with dirt strainer and 2 front plates

Lightweight, sturdy and environmentally friendly due to MEA GRP

Everything you need in the MEAHOME CLASSIC 3-pack
